

# SUSTAINABLE FISHING FOR OUR FUTURE

MANAGED ACCESS

**Managed Access secures fishing grounds by managing access and empowers fishers so as to ensure sustainable fisheries.**

## MANAGED ACCESS COMPONENTS:

**Fishers, take part in  
Managed Access activities.  
Be informed  
and represented!!**

### **ZONING:**

Recognizes fishers by giving access to fishing grounds they depend on for their livelihood.

### **LICENSING:**

Secures right to fish via a transparent, accountable and easier process for licensing.

### **MANAGED ACCESS COMMITTEES:**

Fishers elect representatives to look after their interests and provide recommendations to better manage the fisheries.

### **IMPROVED ENFORCEMENT AND COMPLIANCE:**

Builds awareness and appreciation for better stewardship leading to less illegal fishing.

### **SCIENCE:**

Help measure improvement in fisheries and guides management decisions.

### **MONITORING AND CATCH LOGS:**

Fishers contribute to management by providing data that can be used to make sound management decisions.

### **PRODUCTS AND MARKETS:**

Improved quantity and quality of product for better prices and access to markets.
